

Medical Treatment Program

2-Week Program \$21,500 USD

Includes room tax. Mexican residents add 8% VAT.

In an increasingly toxic world, we are regularly exposed to pollution, pesticides, and other contaminants. Lifestyle factors like an unhealthy diet, stress, and lack of sleep and exercise can put our body in a state of "dis-ease." This taxes our bodies, and our genes try to deal with the onslaught of other unknown stimuli, to which our natural coping mechanisms seem ineffective. The combination of environment, genetics, and lifestyle can be a perfect recipe for chronic disease. The Sanoviv Medical Treatment Program addresses a wide variety of conditions, such as digestive disorders, autoimmune conditions, diabetes, hormone imbalances, cardiovascular and metabolic disorders, and undiagnosed medical conditions.

At Sanoviv, you are assigned a 7-member team to work with you, including a medical doctor, nutritionist, psychologist, chiropractor, biological dentist, fitness professional, and bioenergetic specialist. Experience a completely integrated team to assess and recommend solutions for your health concerns. Together, we take a whole-body approach to your wellness and offer everything under one roof in a beautiful healing environment. From nutritious, prepared meals to advanced alternative therapies, Sanoviv takes care of everything so you can focus on feeling better.

**Colon Hydrotherapy is not available for guests 65 and older, due to a higher risk of complications. Alternate detox therapies may be substituted with your doctor's consent.*

The scenarios listed are examples of tests, medical treatments, and therapies included in this program. Some are only done if indicated by the doctor. This program is sold as a package, and there is no refund or credit for items not received. Each guest is treated according to his or her unique symptoms and needs within the parameters of the program. Occasionally, your medical team may recommend additional tests, therapies, or consultations not included in this program after your assessment that would necessitate an additional fee. These add-on services will only be ordered after being thoroughly explained to you and obtaining your written approval.
